

Rodeo

Saddleproof promotional ballpoint Pen

SADDLE-FIXED AND EFFECTIVE

The aesthetic Rodeo retractable pen impresses with its outstanding design and high functionality. Particularly eye-catching is the uniquely curved saddle clip, which is embedded in the upper part of the pen and offers plenty of space for effective advertising. In addition to the all-plastic versions in high gloss and transparent, the Rodeo is also available in versions with metal elements. The harmonious mix of materials gives the expressive writing instrument a particularly valuable and classy character. The discreet sleeve between the barrel and the upper part can also be used to set great accents in colour or metal optics.

CREATIVE PERSONALISATION

When it comes to personalisation, the Rodeo offers the option of permanent laser engraving on the stylishly curved metal clip, in addition to the usual types of printing. The XL barrel print opens up additional possibilities for creative personalisation ideas.

SILKTECH QUALITY REFILL

Uniquely durable! Another unique selling point of the Rodeo product line is the high-yield Silktech XL quality refill included as standard. With a writing length of 5,000 m and a high-quality tungsten carbide ball, it guarantees long-lasting writing pleasure and an absolutely even typeface.

FLEXIBLE COLOUR DESIGN

Available in 14 intense standard colours, the Rodeo offers an extensive choice of colours. Based on the „mix it, match it“ modular system, the 5 components can be flexibly combined in material and colour again and again. This makes it the perfect companion for our Twista USB sticks. Supplemented by a great case, the product duo is also attractive as a promotional gift.

With the PMS service, the Rodeo can be produced in special colours from an order quantity of 5,000 pieces.
