

Tecto

„The one with the roof clip“

TRENDY TRIANGULAR DESIGN

The eye-catching retractable ballpoint pen **Tecto** impresses not only with its trendy **triangular design**, an **ergonomic grip zone**, but also with its **strikingly designed clip** in the shape of a roof. The dynamic model is completed by a push-button, which is also in a triangular form. In addition to the **standard high gloss** and **transparent** versions, the striking promotional product is also available with a pleasantly **softtouch** or **softfrost** surface. In these versions the clip and push-button are made of transparent plastic. **All components are 100% Made in Germany**. In addition, we bear the „climate-neutral site“ seal (Scope 1 + 2) and produce with **photovoltaics** and **100% green electricity**.

FOR ALL THOSE WHO LOVE GRIP ZONES

The modern pen Tecto has an **ergonomically designed grip zone** made of **thermoplastic elastomer** integrated into the barrel as standard, making it extremely comfortable to hold.

SENSATIONAL 8 PRINTING AREAS

With its wide range of printing options, the **Tecto** is an **ideal promotional medium** for **unique creative personalisation ideas**. In addition to the **5 standard imprint areas** on the **barrel**, the special clip design of the Tecto offers, for the first time, the option of **printing on the right and left side** or even **across the edge of the clip**.

FLEXIBLE COLOUR DESIGN

Available in up to **14 standard colours**, the **Tecto** offers a **wide range of colours** to choose from. Based on the „mix it, match it“ **modular system**, the **5 components** can be combined freely again and again in **different materials and colours**.

With the **PMS service**, the Tecto can also be produced in **special colours** from an order quantity of **5,000 pieces**.
