

Unique

Luxury and elegance for unique occasions

EXCLUSIVE AND NOBLE

The Unique product family combines special materials with high-quality workmanship and exquisite design. In addition to the traditional ballpoint pen, the high-quality metal writing instrument is also available as a refined rollerball variant. The already very valuable overall impression is supported by the high dead weight and the spring-loaded steel clip.

HIGH QUALITY MATERIALS

Whether modern carbon or noble walnut wood the Unique models convince both visually and haptically and leave a lasting impression on the user. Made of solid brass, the writing instruments have a shiny silver tip and a matching upper part. Same as the ballpoint pens, the grip section and cap of the rollerball variants also have a silver look.

The Unique ballpoint pens have an extremely long-lasting Multifill P refill with up to 8,000 m writing length. The rollerball variants are equipped with the smooth-running RO-S refill with up to 800 m writing length. Both refills ensure long-lasting writing pleasure.

TIMELESS GIFT IDEA

The combination of elegant heaviness and velvety-soft writing feel make this premium writing instrument a timelessly beautiful gift idea.

The personalisation in the form of a permanent laser engraving and a matching gift box round off this individual and exclusive gift.
